User Guide:
* Stand close to an art piece to hear about it. The audio guide works the best when the user is facing the art piece.
* If the user wishes to pause the audio, press the pause button at the center of the screen.
* Do not press the sleep button. If accidentally pressed, restart the app.

Maintaining Suggestions:

* **Restart the app before handing to a new user** —> clears the cached music progress data from the previous user.
* **Restart all 5 anchors every morning, by turning off all anchors first and then turning on anchors starting from anchor 0 (the anchor near the door)** —> sometimes small accuracy issues may come up and make the audio guide jump among art pieces, and usually restarting anchors fixes the issue.
* If audio guide constantly plays information for one art piece, **replugging the tag** usually fixes this issue.

If any issue occurs, please feel free to email me.
